# TUTORIALS

With Tutorials, students close learning gaps and build their confidence so they can master the class, raise test scores, and be ready for what comes next.

# MORE SUCCESS FOR MORE STUDENTS

Provide more opportunities for student success. Whether providing greater challenge for accelerating students or more support for struggling students, TPT International digital curriculum meets each student where he or she is. Embedded scaffolds for English language learners, below proficient readers, and students with learning gaps help students achieve greater success. More than 20 research studies demonstrate the efficacy of the TPT International digital curriculum.

TECHNOLOGY

# COURSES

Technology courses for Grades 9-12

## OPPORTUNITY AND **CREATORS**

TPT International Technology Courses give students the opportunity to go beyond being users of technology to becoming creators themselves. The creative, technical, problem solving, and critical thinking skills they develop are applicable to any career, technology related or not.

## ACCESS TO **EXPERT SUPPORT**

Because many teachers may not have experience with the professional tools used in these technology courses, students have access to support from experts online to ensure they can successfully complete their projects and coursework.

## STUDENTS AS **CREATORS**

Students complete projects such as developing an iOS or Android app, creating a 3D video game, or designing a fashion collection. While doing so, they gain experience with the industry-standard tools used by professionals
